SUMMARY

Software Engineer with 4+ years building production frontend systems for cybersecurity and data-heavy enterprise products. Specialized in frontend architecture, design systems, and component libraries. Led a 900+ component migration to React/MUI and shipped an internal design system adopted across 4 product teams. Core stack: TypeScript, React, Next.js, GraphQL. Active open-source contributor to data visualization libraries (ReaViz, ReaGraph, ReaBlocks).

SKILLS

Languages & Frontend: TypeScript, JavaScript, React, Next.js, Redux, TanStack Query, TanStack Table, Tailwind CSS, MUI, Framer Motion, Vite, HTML5, CSS3

Backend & Data: Node.js, Express.js, REST, GraphQL, PostgreSQL, AWS S3, Docker

Testing & Tooling: Jest, React Testing Library, Storybook, Git, GitHub, GitLab, Vercel, Figma

Practices: Frontend Architecture, Design Systems, Component Libraries, Performance Optimization, Web Vitals, Accessibility (WCAG), Responsive Design, Code Review, Agile/Scrum

EXPERIENCE

Senior Software Engineer

Sep 2024 - Present

Good Code | New York, NY

Agency specializing in frontend architecture, UI/UX, and web applications for the cybersecurity domain.

- Led migration of 900+ components to a React/MUI architecture with zero production downtime; established migration patterns and component conventions adopted as team standard.
- Designed and shipped an internal design system (81 components, adopted by 4 product teams) with multi-layer design tokens, theming, accessibility, and Jest/RTL test coverage.
- Architected frontend for a real-time cybersecurity analytics platform serving dozens of enterprise customers, using React, TypeScript, and GraphQL to visualize high-volume threat data streams.
- Built and shipped the frontend for an internal AI-powered threat monitoring tool (chat + CRUD dashboard); partnered on API design and reviewed PRs.
- Reduced page load time and improved Core Web Vitals on the company's Next.js marketing site through SSR and animation optimization, driving a 19% increase in unique user traffic.
- Contributed features and performance fixes to open-source data visualization libraries (ReaViz, ReaGraph, ReaBlocks) used in production dashboards.
- Partnered with design and product on component API decisions; reviewed PRs and wrote technical design notes to align implementation across teams.

Full Stack Software Engineer

Mar 2023 - Sep 2024

Blue and Yellow Foundation | New York, NY

Non-profit organization providing humanitarian aid to the people of Ukraine.

- Lead engineer on a small team building an end-to-end donation and fundraising platform in Next.js, React, and PostgreSQL; owned architecture, frontend, REST API, and deployment.
- Reduced page load time by 48% (4.11s → 2.13s) through Next.js SSR, code splitting, and image optimization; improved Core Web Vitals and organic search traffic.
- Designed and implemented REST API endpoints and PostgreSQL schemas for donations, donor management, and campaign tracking, replacing reliance on external APIs and reducing infrastructure cost.
- Integrated Stripe for production payment processing - built the checkout flow and handled payment state.

Front-end Software Developer

Sep 2021 - Feb 2023

Highlight Agency | New York, NY

Creative agency focused on storytelling and integrated brand campaigns.

- Contributed to a high-traffic e-commerce platform serving 5,000+ daily users, collaborating with designers and backend engineers on features across the React frontend.
- Integrated OpenAI into a production chatbot, implementing prompt handling and conversation UI for customer engagement features.
- Worked with creative directors and account teams to translate client requirements into product features, balancing technical constraints with brand and campaign goals.

EDUCATION

Master of Science (M.S.) in Computer Science and Mathematics

National Pedagogical Dragomanov University | Kyiv, Ukraine
